THE HOSPITABLE CITY CHARTER

Another important goal that has been achieved by the European Project CARE – *Accessible Cities in European Region* is the HOSPITABLE CITY CHARTER, a useful instrument to start the process of spreading the good practices a city should know to be able to host all the different types of tourists.

Partners of the CARE project have prepared and approved this Charter that so far represents a unique document that the project aims at promoting on the whole European territory. The Charter contains all the key principles that a city which wants to join the CARE network of hospitable cities shall follow, from the acknowledgement of the citizens' right to equality and equal opportunities to viewing the tourist as a contemporary citizen; from the commitment to improve access and information to tourist sites to the definition of the concept of positive communication.

The Charter has been approved by the CND (Italian's National Disability Council) and by FISH (Italian Federation for Overcoming Handicaps).

**This project is cofunded by the European Union as part of the
CADSES - Interreg III B European Programme**
